

Dry German Riesling Grosses Gewächs

From the top-rated vineyards in Germany, these wines are vaunted as the pinnacle of quality – and the focus is shifting from power to finesse, says Anne Krebiehl MW

THIS PANEL TASTING encompassed the whole of Germany – 13 wine-growing regions covering 4° of latitude (from 47.5°N in Baden to 51.5°N in Saale-Unstrut), and every imaginable kind of soil. However, rather than look at all levels of Riesling, it focused in on Grosses Gewächs ('great growth'), the top category of the VDP's private classification. So the wines came only from VDP member-estates, but covered the breadth of German dry Riesling: only the tiny Hessische Bergstrasse and Mittelrhein were missing, as were the easterly outposts of Sachsen and Saale-Unstrut. But certainly the heartlands of German Riesling were well represented.

Grosses Gewächs wines are made from clearly delimited single vineyards that have been classified as Grosse Lage ('grand cru'), and are produced to stringent regulations. All GGs are trocken (dry), which in Germany means no more than 9g/l of residual sugar. Only three of the 95 wines tasted touched this mark, while a further seven were in the vicinity – but they had the acidity to provide the balance. I must emphasise that at these levels sugar acts as flavour-enhancer rather than sweetener, as is amply demonstrated in brut sparkling wines, which likewise come with high acidity and easily accommodate six or even eight grams of dosage while being perfectly dry. All this is to say: if you are looking for dry Riesling, the GGs are your go-to category. Most of these wines were around the 5g/l mark and below, with higher acidities than your average white.

Delicate balance

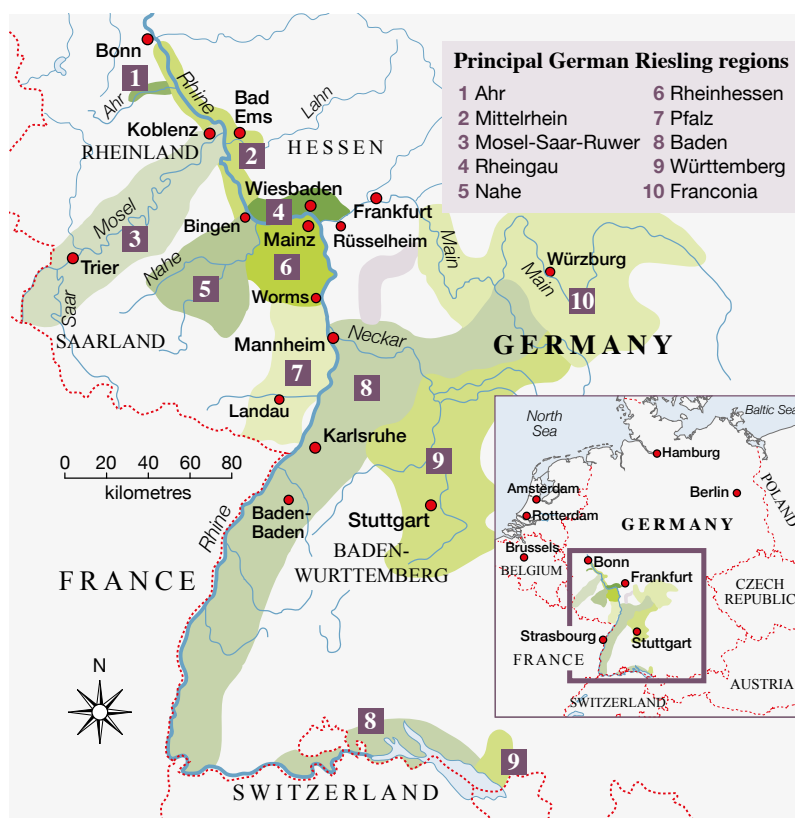

When GG wines were first made in the early 2000s, it was still thought that an estate's top wines had to show their mettle. The mindset has since shifted from power back towards elegance, with delicate alcohols of 12.5% and below for almost half the wines here. The Germans have discovered what makes their wines truly German: a cool finesse and depth. When the 2016 white GGs were first released last August, the regions that stood out were the Nahe, Rheinhessen and the Pfalz: the Nahe for its uncompromising drive for purity and expression; Rheinhessen for embracing its inherent diversity, from Roter Hang via Wonnegau to its far west, close to the Nahe; and Pfalz for its exemplary restraint and nuance.

German Riesling: the facts (2016)

Total Riesling 23,700ha (of a total 102,493ha under vine)

Riesling plantings by region Pfalz 5,850ha; Mosel 5,395ha; Rheinhessen 4,536ha; Rheingau 2,495ha; Württemberg 2,113ha; Nahe 1,202ha; Baden 1,069ha; Franken 343ha.

Germany: know your vintages

2016 A difficult year: a humid spring and summer affected yields rather than quality, but a long, dry and warm autumn saved the day, allowing great aromatic development. Subtle Rieslings for the long run.

2015 A dry, warm year with a 'gloriously sunny' September gave rounded, sunny, ripe Rieslings. Hailed as a great vintage.

2014 Challenging year with some rain, but stringent selection delivered racy, taut wines.

2013 Tiny vintage, difficult year, selection was everything.

2012 Ripe, balanced, long-lived.

2011 Great in the Mosel, very good in other regions.

Riesling plantings. While 23% of Germany's vineyards are planted to Riesling, the variety accounts for 55% of VDP estate vineyards. According to the VDP, its members are responsible for 12% of Germany's Riesling vineyards and 5% of the world's. The VDP has just 3% of the total German harvest, but this accounts for 7.5% of the total turnover. Grosses Gewächs represents just 5% of production.

The results

A consistently high-scoring tasting, showcasing the finesse and ageability of dry German Riesling. Our experts tell Tina Gellie why wine lovers need to try them

OUR TRIO OF expert judges were impressed at the quality of wines on show in this tasting, encouraging wine lovers to stock up their cellars.

German Riesling has ‘finally come of age’, said Sebastian Thomas: ‘Five years ago I don’t think anyone would have considered doing a Grosses Gewächs tasting, because even as recently as that Riesling wasn’t really mainstream. But the GG category has been very successful in a short space of time, and that’s very exciting.’

Anne Krebiehl MW was pleased that producers had toned down the wines’ power. ‘In 2002, when GG was first presented as an official category, winemakers thought, “If this is my top wine, then bigger is better”. The GG wines almost got lost in a power play. But German Riesling is powerful not by brawn, but by acidity, ageability and finesse. I’m so happy producers have stopped chasing that misguided idea.’

In terms of regions, quality was very consistent. ‘I’ve never seen so many wines scoring 90 points or more,’ said Thomas. ‘Of course there were some poorer examples, but there wasn’t a single region we thought was underperforming – even those we don’t know well.’

In the latter camp was Württemberg, which was ‘a real discovery’ for Gearoid Devaney MS. ‘It was a really solid showing,’ he said. ‘They probably weren’t troubling the higher scores, but the wines were good, in a richer, spicier style.’

There was unanimous agreement that Rheinhessen was the most exciting region, offering a broad range of styles with real energy. ‘Lots of balance, elegance and purity,’ said Devaney, ‘and when I think of Riesling, purity is always the key word.’ Close behind was Nahe, whose wines Devaney found had ‘good acidity, lovely fruit expression and excellent tension – “wine for grown-ups” was what I wrote in my notes’.

‘The GG category has been very successful in a short space of time, and that’s very exciting’ Sebastian Thomas

Pfalz divided the judges somewhat, with Thomas enjoying them more than Krebiehl and Devaney, who found the toasty oak a bit dominant in a few examples.

Rheingau was criticised for being a bit uneven in fruit weight and oak, as well having ‘unsuitable oxidative or natural winemaking elements’. ‘We should have seen more from these historic vineyards,’ bemoaned Krebiehl. Meanwhile, Mosel was deemed ‘a work in progress’.

Thomas explained: ‘The wines are good, but the winemakers are still coming to terms with the fact that residual sugar is not what is wanted in this dry GG style. But they’ll get there.’

Regardless of the region, the big selling point with these wines was their incredible capacity to age, said Thomas, particularly the ‘luscious, perfumed’ 2016s and ‘powerful, rounder’ 2015s. ‘Some of the great dry wines of Germany have matured very well, so these GGs have enormous capacity to last – 15, 20, 30 years no problem.’

But drinking them earlier was fine too, assured Devaney. ‘It’s subjective, but for my palate, I think the sweet spot would be 10 to 12 years from the vintage. Of course they will age beautifully for far longer, but if you pull a cork on one, you’re not going to be upset!’

Our experts urged those unfamiliar with or unsure about dry German Riesling to give them a try. ‘The producers have really stepped up to the plate,’ said Thomas. ‘They’re making wines that easily hold their own with the best dry whites in the world, and you can really taste that here.’

The monks of Kloster Eberbach have been producing wine here for almost nine centuries – at one point in its history it laid claim to being the largest wine estate in all Germany. The Marcobrunn vineyard’s existence can be traced back to the end of the 14th century, making it one of the oldest monastic vineyards in the world. It’s a south-facing site on deep, calcareous clay-marl soils, farmed using organic methods.

GD Fresh, lively, green apple, citrus, lime skin, linear and focused. Classic style and long, with a pleasing finish.

AK A plump fullness on the nose leads into a palate of concentrated freshness, with easy fruit and a textured mouthfeel.

Gearoid Devaney MS Fresh and open, with plenty of concentrated lime zest and green apple on the palate, balanced by bright acid and leading to a mineral finish.

Anne Krebiehl MW This is a very subtle wine, only slowly revealing its depth of citrus fruit. It’s gentle, delicate and long, demonstrating seamless elegance.

Although Kühling-Gillot can point to more than 200 years of heritage, it is very much at the vanguard of contemporary German winemaking. Its vineyards are located in the area of Nierstein, overlooking the Rhine, and are run using biodynamic practices. Its plot in the southeast-facing Hipping vineyard is near the top of the slope, where the vines sit on bare rock composed of red slate. The handpicked grapes are fermented using wild yeasts, then the wine is racked to 1,200-litre barrels where it rests on its fine lees until bottling.

GD This shows ripe, juicy fruits with great concentration, and is pleasing and elegant.

AK A touch of reduction, but underneath there’s an honest purity. It’s a wine that is light but expressive, slender but toned. Very lean, with a cleansing finish.

ST Bright, perfumed floral and citrus flavours are accompanied by a fine dash of smoky minerality. It’s fine and ripe, wearing the residual sugar well. Very understated and elegant on the long finish.

St Antony, Hipping, Rheinhessen 2016

N/A UK www.st-antony.de

The limestone from the land around St Antony was once used to smelt iron, but as demand slumped following the end of the World War I, the ironworks’ owners moved into wine production instead. The Hipping vineyard plot, on the Roter Hang escarpment, is exposed to the north, bringing cooler conditions which ensure the grapes ripen slowly, helped by its proximity to the Rhine. The vines are tended following biodynamic practices, which extends to gentle, gravity-fed handling in the winery. This Riesling was fermented in a 100-year-old barrel.

GD Bright and open, this has lots of ripe apple and pear on the nose. It’s more citrusy on the palate, with well-balanced acidity and alcohol. Elegant and harmonious, with a long finish.

AK Fragrant herbal notes with tangerine and lemon flavours. It’s a gentle wine, not overdone. Bright and fresh.

ST Very spicy, with some herbal notes, lovely balance and ripeness. Well integrated acidity leads to a long, juicy finish. Fine and elegant.

It is one of the top sites in Pfalz, boasting soil which is absolutely crammed with minerals. The grapes are hand-harvested in several *tries*, and the must is given time to settle naturally. Wild yeasts trigger fermentation, after which the wine matures on its lees, undergoing regular bâtonnage.

GD Fresh and floral, sweet fruit flavours of peach and ripe pear, with good acid and texture. It’s harmonious and complex, with a long finish.

AK There’s a slightly tropical overtone, with tons of lemon at the core. It’s taut and clean, with some texture and a hint of creamy richness. Austere, but so promising.

■ **Geheimer Rat Dr von Bassermann-Jordan, Jesuitengarten, Pfalz 2016** I was very happy to see a wine from Basserman-Jordan among my top picks: I have been following the wines for a long time and it is an estate steeped in the history of wine in the Pfalz. This wine was complex, elegant with so much potential. Enjoy! **96 Drink** 2019-2035

■ **Kühlung-Gillot, Hipping, Rheinhessen 2016** From red shale soils on one of the top terroirs in Nierstien, this wine was excellent and shows the depth of quality of dry wines in Rheinhessen right now. Definitely a wine I will source for my own cellar. **96 Drink** 2018-2032

■ **Dönnhoff, Hermannshöhle, Nahe 2016** A wine that I have bought for my own cellar and it never disappoints. From the best vineyard in the Nahe, full of black slate and good south-facing aspect and one of Germany’s great winemaking families. **93 Drink** 2019-2030

My top three
Anne Krebiehl MW

■ **Wagner-Stempel, Heerkretz, Rheinhessen 2016** A cooler site than Höllenberg, Wagner-Stempel’s other GG site. Gentle and complete, its seamless elegance shows what this part of the Rheinhessen can do. **97 Drink** 2019-2032

■ **Krüger-Rumpf, Im Pitterberg, Nahe, 2016** I have to highlight one Nahe wine. My tasting note really encapsulates what German Riesling is all about: a wine that’s transparent, racy and refreshing, something that you simply want more of. **95 Drink** 2019-2034

■ **Schloss Neuweier, Robert Schätzle, Goldenes Loch, Baden 2016** From a tiny, steep 1ha vineyard on granitic soils, restored in 1993. A sunnier, rounder Riesling than Rheingau and Mosel; immense juiciness, zesty tension, purity and length. **93 Drink** 2018-2026

■ **Wagner-Stempel, Heerkretz, Rheinhessen 2016** I had heard good things about this estate, but never tried its wines. Tasting the flagship Heerkretz was a revelation: it was understated and astonishingly fine. **99 Drink** 2019-2032

■ **St Antony, Hipping, Rheinhessen 2016** It is a pleasure to taste this long, supremely elegant wine bursting with spicy, herbal flavours, fresh orchard fruit and zesty citrus. **97 Drink** 2019-2033

■ **Karl Haidle, Pulvermächer, Württemberg 2016** It is not hard to sell your wines if you are in the Remstal: local demand is so great that not many wines leave the area. Yet many excellent wines are produced, among them those by the charming Moritz Haidle, who sidelines as a rapper. This has clear minerality and a pure weighty finish. **91 Drink** 2018-2027

NB: the tasters’ top wines are not necessarily their top-scoring, rather those which, on learning the wines’ identity, they feel are the most notable given their provenance, price or other factors
